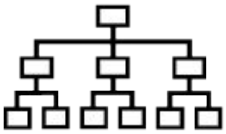
“Is it a System?” Test



System: _____

Are there parts? List 4-5 of the parts,	
Do the parts affect each other? Give 1 example of how 1 part affects another.	
Does it matter how the parts are arranged (put together)? Explain what happens if 1 part were swapped with another part.	
Does the behavior of the system change if a part is taken away? Explain what would happen if 1 part was taken away.	
Does the interaction of the parts produce an effect that is different from that of any part on its own?
